

I am opposed to relaxing the FCC regulations allowing corporations to own an increased number of broadcast and print media. It is my opinion that our access to all sides of an issue have already been compromised by the decrease in the number of owners of print and broadcast media. Further reduction in the number and diversity of the number of owners will again limit our access to a variety of points of view so that we the public can make a fair and informed choice. If nothing else, all votes should be delayed until there can be a debate in congress.
